BEFORE FIRST USE:
The factory-loaded battery pack is not fully charged; the charge is useful only for testing! Before first use, charge the battery fully following the instructions on [RECHARGING INSTRUCTIONS].

CONTENTS
The ABS-10 are the combined system of the following parts. Make sure that your package includes all the parts.

HOW TO SETUP
Attach the bracket (H-32) to the handlebar. Turn over the quick lever and it is fastened. Slide the lamp units onto the brackets. To remove the lamp body, slide it forward while pushing the lever. Note: Use the quick lever to adjust 10° horizontally.

Warning!!! When removing the lamp body, make sure that it has been cooled. Attach the switch unit onto the handlebar where it will not hinder the braking and shifting operation.

Connecting Battery Pack and Cord
Choose your favorite location to attach the battery packs.

When attaching to bottle cage
Attach the holder onto the down tube using the holder mounting bolts (L or S). Battery pack and fit it between the top tube and the battery, so that the battery will not move when riding.

When attaching to frame
Fix the battery pack firmly to the frame, using the battery belts. Cut the battery pad and fit it between the top tube and the battery, so that the battery will not move when riding.

Connecting Cord
Connect the battery pack, joint cord and the switch unit as illustrated.

Attention:
- Secure the cord along the frame with the cord belt, so that it will not hinder riding.
- Wind the cord round the frame so that it will not hinder riding.
- Securely connect the jacks to the plug.

Note: You can connect one more battery pack (available as an optional part). This way the run time will be double. For this connection, the Double Holder (#533-8785) is recommended.

Attention:
- If the cable is not covered by cable housing, use the included cable cover to prevent direct contact between the cable and the belts. (Cut the cable cover to the suitable length.)

SAFETY SYSTEM (AUTO-RESET FUSE)
When an electrical surge or malfunction occurs in the circuit or the temperature of the battery rises, the fuse blows due to its safety system and the circuit will be closed. After leaving it for a while, the fuse will automatically restore.

Note:
- Use only CAT EYE 6V halogen bulb.
- Recharge after thorough discharge. (in order to prevent memory after effect)
- Use exclusive charger.
- Recharge only when battery power has completely diminished.
- Recharged batteries at the same time.
- Use only the ABS charger.
- For indoor use only.
- Red indicator color —- Empty/Not charged.
- Green indicator color — Fully charged.
- Recharge/discharge number of times: about 500 times (until the rated capacity drops to 50%).

RECHARGING INSTRUCTIONS
- Recharge/discharge number of times: about 500 times (until the rated capacity drops to 50%).
- * The specifications and design are subject to change without notice.
- The ABS-10 is a combination system of a lamp, battery pack and charger. Before operating, thoroughly familiarize yourself with this manual so that you understand the lamp’s safe and correct operation. Please keep this manual, along with the warranty card, for future reference.

READ ALL INSTRUCTIONS BEFORE FIRST USE
Thank you for purchasing the CAT EYE ABS Advanced Battery System, a unique 6 volt rechargeable head lamp series. ABS-10 is a combination system of a lamp, battery pack and charger. Before operating, thoroughly familiarize yourself with this manual so that you understand the lamp’s safe and correct operation. Please keep this manual, along with the warranty card, for future reference.

SAFETY OPERATIONS (IMPORTANT)
- Never short-circuit the terminal of the battery pack and the plug of the battery charger. It may cause the battery to over heat, resulting in fire or damage of the components.
- Securely connect the plug so that the light will not turn off while riding, or the cord will not hinder riding.
- Never use the ABS if the cord of the battery charger or the switch unit is damaged. Consult with the shop where this lamp kit was purchased.
- The lamp body becomes extremely hot when turned on. Never touch the lamp body or the lens until thoroughly cooled. Injury may result.
- Use only the designated battery charger for charging.
- Never mix different types of battery packs.

Warning!!! Safety and property dispose of the old battery according to your local regulations when it comes to the end of its useful life.

- This lamp kit is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with this appliance.
- The battery’s nature will affect the light output. High light output will remain just before the battery runs out. After this, the light output drops suddenly. Take precautions against such a situation and prepare a spare light or spare battery packs.
- Long periods of non-use will lower the voltage of the battery and will naturally self discharge. Always charge the battery before using.
- Over discharge (leaving the light on after the power is completely gone) shortens the performance life of the battery.
- If the lamp body or parts become dirty with mud, etc., clean with a soft cloth which is moistened with mild soap. Never apply paint thinner, benzine or alcohol; damage will result.

• To adjust the angle of the lamp unit, use the quick lever.

The switch unit controls the operation of the lamps.
Run Time: 1.5 hrs
Note: The run time shown here is the calculated figure.
- The beam angle must be downwards.
- To adjust the angle of the lamp unit, use the quick lever.

Note:
- Battery life will vary due to adverse conditions.
- Fully charged batteries that yields no power means battery life is dead.

- Recharge/discharge number of times: about 500 times (until the rated capacity drops to 50%).

Important Notes
- The ABS-10 is a combination system of a lamp, battery pack and charger. Before operating, thoroughly familiarize yourself with this manual so that you understand the lamp’s safe and correct operation. Please keep this manual, along with the warranty card, for future reference.

- Reset the switch unit as illustrated.
- Recharge after thorough discharge. (in order to prevent memory after effect)
- Use exclusive charger.
- Recharge only when battery power has completely diminished.
- Recharged batteries at the same time.
- Use only the ABS charger.
- For indoor use only.
- Red indicator color —- Empty/Not charged.
- Green indicator color — Fully charged.
- Recharge/discharge number of times: about 500 times (until the rated capacity drops to 50%).
- The specifications and design are subject to change without notice.

Specifications
- Bulb: 6V Halogen wide bulb (10W)
- Battery pack: HI MA-MH battery 6V 3000mAh
- Battery charger: HI NI-MH charger CHR-3005
- Standard charging time: 8-10 hours
- Temperature range: Charging: 0°C - 40°C Operating: –15°C - 45°C
- Recharge/discharge number of times: about 500 times (until the rated capacity drops to 50%).
- The specifications and design are subject to change without notice.
- 2-Year Warranty: Only for Lamp unit, switch unit, battery pack and charger.
- Only for Lamp unit, switch unit, battery pack and charger.
- Excluding bulb and deteriorated battery.
- Address for service: CAT EYE CO., LTD.
- There is a pad inside of the jack socket to prevent the plug from falling off the socket. When this pad is deteriorated and you feel the plug’s connection is loose, replace the pad with a new one.

- Use only the CAT EYE 6V halogen bulb.
- Recharge after thorough discharge. (in order to prevent memory after effect)
- Use exclusive charger.
- Recharge only when battery power has completely diminished.
- Recharged batteries at the same time.
- Use only the ABS charger.
- For indoor use only.
- Red indicator color —- Empty/Not charged.
- Green indicator color — Fully charged.
- Battery life will vary due to adverse conditions.
- Fully charged batteries that yields no power means battery life is dead.

• The home power outlet
- Recharge after thorough discharge. (in order to prevent memory after effect)
- Use exclusive charger.
- Recharge only when battery power has completely diminished.
- Recharged batteries at the same time.
- Use only the ABS charger.
- For indoor use only.
- Red indicator color —- Empty/Not charged.
- Green indicator color — Fully charged.
- Battery life will vary due to adverse conditions.
- Fully charged batteries that yields no power means battery life is dead.

• Warning!!! Safety and property dispose of the old battery according to your local regulations when it comes to the end of its useful life.
